\$697 to **\$5,997** / month

What Is a Funnel Site?

A **funnel site** is a focused, distraction-free landing page (or short series of pages) built for one goal: turning visitors into buyers or leads as efficiently as possible.

Instead of sending paid traffic to your main shop — which has navigation menus, category pages, and distractions — you send people to a dedicated funnel that guides them step by step:

1. Attention

Strong headline, video, or offer that matches the ad they clicked.

2. Interest

Benefits, social proof, research-style info, testimonials.

3. Desire

Clear offer, pricing, guarantees, urgency, bonuses.

4. Action

Big “Buy Now” button straight to checkout or order form.

Why Funnel Sites Work

- ✓ Higher conversion rates than a full e-commerce store
- ✓ Easier to A/B test offers, headlines, videos, and prices
- ✓ Better for paid traffic — the page matches the ad exactly
- ✓ Can be carefully worded for compliance (critical for peptides)
- ✓ Run multiple campaigns simultaneously without cluttering the main site

Example Flow

You run a TikTok video about a specific product → the link goes to a clean 1–3 page funnel site that only talks about that product → the visitor buys or joins an email list → then you can send them to the main shop later.

In your packages, “support for up to 5 funnel sites” means we help create, optimize, track, and improve these focused pages so more of your ad and social traffic actually turns into sales.
